CHARLES ALDRIN T. MENDOZA

Sto. Tomas, Pampanga, 2020 • charlesmendoza1023@gmail.com • +63 995-181-3692

Professional Summary

Computer Engineering graduate with hands-on experience in web development, manual software testing, debugging, database management, hardware-software integration, and technical documentation. Contributed to academic and internship projects involving web applications, document management systems, IoT devices, and sensor-based prototypes. Interested in software development, quality assurance, and AI-powered systems, with a strong willingness to learn modern testing tools and automation.

Work Experience

Knowledge Management and Innovation Office - Intellectual Property Center - Pampanga State University

Web Development and Systems Support Intern

February - May 2026

- Developed and maintained website components using HTML, CSS, and JavaScript
- Contributed to the development of an accreditation document management system
- Assisted with database management, digital record organization, and information retrieval
- Tested system functions, identified technical issues, and implemented improvements based on user feedback
- Collaborated with team members to troubleshoot system issues and verify completed improvements
- Prepared technical documentation, reports, project files, and evaluation materials
- Maintained attention to detail when handling documentation, records, and project information

Projects

Analysero: IoT-Based Smart Carabao Milk Analysis Prototype

Software, Testing, and Documentation Lead

- Helped develop an IoT prototype that analyzed carabao milk using physicochemical and optical sensor readings.
- Assisted in integrating sensor data with the system's software interface and mobile application.
- Performed functional testing, debugging, sensor calibration, and prototype evaluation to identify hardware and software issues.
- Designed the mobile application's UI/UX to present milk analysis results in a clear and accessible format.
- Prepared technical documentation and testing records that supported prototype evaluation, troubleshooting, and final project presentation.

The Kitchen Gastronomy

UI/UX Design Lead / Software Contributor

- Designed the website's UI/UX, including its layout, colors, navigation, and content presentation
- Helped develop and style the website using CSS, JavaScript, and Bootstrap
- Created a responsive interface with service cards, image carousels, and contact details
- Helped improve the website's usability and overall visual appearance

Core Skills

- **Programming:** Python, JavaScript, HTML, CSS, C, C++, Java
- **Web & UI/UX:** UI/UX Design, Responsive Web Design, Bootstrap, Interface Improvement
- **Software Testing:** Manual Testing, Bug Identification, Debugging, Troubleshooting, Prototype Evaluation
- **Systems & Data:** Hardware-Software Integration, Database Management, Sensor Calibration, Requirements Analysis
- **Documentation:** Technical Documentation, Bug Reporting, Test Documentation
- **IoT & Hardware:** ESP32, Raspberry Pi, Arduino, Sensor Integration, Sensor Calibration, System Prototyping
- **Development Tools:** Visual Studio Code, Arduino IDE, MySQL, Microsoft Word, Excel, and PowerPoint, Canva, Autodesk Fusion 360, Video editing using Sony Vegas and Capcut

Education

Pampanga State University — Bacolor, PAMP

Bachelor of Science in Computer Engineering — 2022-2026

University of the Assumption — San Fernando, PAMP

Senior High School: Science,Technology, Engineering, Mathematics (STEM) Strand — 2020-2022
